

# The Future of Water in a Green World

*Developing Green Infrastructure – Contributing to a Healthy Future For Water and People*

## 5th Annual Water Symposium

Thursday, June 18, 2015

McKimmon Center ♦ 1101 Gorman Street ♦ Raleigh NC 27606

The shift from traditional gray to green infrastructure across the US is helping communities, cities and companies increase their resiliency to everyday and once-in-a-lifetime weather events through more natural approaches to handling stormwater.

Plants and pervious surfaces manage stormwater at the watershed and site level. Parks, urban forests, green roofs, rain gardens, constructed wetlands, permeable pavement, cisterns...these are the new roots of urban resilience.

With the valid concerns of how to meet the water challenges of our rapidly urbanizing society; this is a “must be there” event.

*Be a Sponsor and let us promote your company or business to hundreds of NC water conscious - green industry individuals across the state.*

**Your support for this important event is critical in bringing together:**

- ◆ Water policy makers & Water purveyors
- ◆ Nurserymen/Greenhouse growers
- ◆ Engineers
- ◆ Landscape Architects & Landscape Designers
- ◆ Stormwater Managers
- ◆ Environmental consultants
- ◆ Irrigation and Landscape contractors
- ◆ NCSU faculty and researchers
- ◆ Property managers
- ◆ ...and the many others dependent on water

### Sponsorship Options

**\$2000 Symposium Host Sponsor**

6' Tabletop exhibit, 4 tickets for the greeters/attendees at the table; company logo and link for a year on the public information “SavingWaterNC.com” website; prominent signage at Registration location; prominent recognition on event signage and on all marketing materials.
